

Goolee.my

Simple Guide

How to use the attendance clock
How to manage the Google Sheet
Everything you need — in one guide.

FOR EMPLOYEES & HR

The system has two parts

Understanding this makes everything else simple.

The web page

Where **employees** clock in and out. Opens in any phone or computer browser. Also called “attendance.goolee.my”.

The Google Sheet

Where **HR** manages employees, leave, holidays, and the dashboard. Also called “the spreadsheet”.

The flow of data

1

Employee punches in on the web page

Name, PIN, GPS location, and time are sent automatically.

2

The Google Sheet receives the punch

One new row appears in the *Attendance* tab.

3

HR sees it on the Dashboard

Today's KPIs, employee performance, and daily log update.

Nothing happens by magic

The web page and the Google Sheet are connected through Google Apps Script. But you don't need to touch the Apps Script — everything is managed from the Sheet.

Employee: How to clock in

6 simple steps — takes about 10 seconds.

1**Open the attendance page**

Use the link HR gave you. Save it to your home screen for easy access.

2**Wait for the green bar**

It says *"Location ready"* once your GPS is locked. Usually 3–5 seconds.

3**Pick your name**

Choose your name from the dropdown list.

4**Type your PIN**

Your 4-digit PIN. You'll see dots as you type.

5**Tap the green "Clock In" button**

A green checkmark appears with your name, time, and location.

6**Done — close the page**

HR sees your punch instantly on the Sheet.

✓ Clock Out works the same way

Follow the same 6 steps, but tap the **red Clock Out** button at step 5.

Employee: Working hours & rules

When you're on time, late, or leaving early.

START WORK**10:00 AM****END WORK****7:00 PM****LATE AFTER****10:15 AM****EARLY BEFORE****6:45 PM**

How your punch is marked

**On Time**

You clocked in before 10:15 AM

**Late**

You clocked in after 10:15 AM

**Left Early**

You clocked out before 6:45 PM

**Overtime**

You clocked out after 7:00 PM

Simple rules

- ✓ Clock in when you arrive
- ✓ Clock out when you leave
- ✓ Keep your PIN private — never share it
- ✓ Allow location access on your phone
- ✓ Only one clock-in and one clock-out per day

Employee: When things go wrong

Common problems and how to fix them.

"Location permission needed"

Tap the  lock icon in your browser bar → set Location to "Allow" → reload the page.

"Location not accurate enough"

Step outside or near a window. Wait 10 seconds. Tap

Retry

"Wrong PIN"

3 tries allowed. After 3 wrong tries, wait 5 minutes before trying again.

Forgot your PIN?

Ask HR. They can reset it in a few seconds.

"Already Clocked In"

One clock-in per day. Tell HR if this is a mistake.

"Cannot reach server"

Check your internet. Refresh the page. If it keeps failing, tell HR.

Buttons are grey / can't tap?

Wait for the green location bar. Buttons unlock only when your location is ready.

HR: The spreadsheet tabs

Your Google Sheet has 6 tabs. Here's what each one does.

Dashboard

Company overview

Auto-built. Shows KPIs, employee performance, holidays, and daily log. Read-only.

Employees

Staff list

Name, PIN, Active, Role, Joined Date. **You edit this.**

Attendance

Raw punch log

Every clock-in/out with GPS and time. **Auto-written.** Don't edit.

Leave

MC & leave records

Date, Name, Type, Notes. **You edit this.**

Holidays

Public & company holidays

Date, Holiday Name, Type. **You edit this.**

Settings

Working hours & rules

Start/end time, late threshold, working days. **Rarely changed.**

Where to click

Look for

Goolee

in the top menu bar of your Google Sheet (next to Help). Everything you need to run the system is there.

HR: Daily routine

Two short check-ins per day keeps everything accurate.

Every morning

- 1 Open the Dashboard tab**
Look at the top box — how many are present, late, on leave.
- 2 Check for absences**
Anyone missing? Call or message them. Cross-check WhatsApp or sick notes.
- 3 Mark any sick leave**
If someone called in sick, add a row in the Leave tab.

Every evening

- 1 Refresh the Dashboard**
Menu:
Goolee →  **Refresh Dashboard**
- 2 Scan the daily log**
Look at the bottom for red “Late” rows or missing clock-outs.
- 3 Follow up as needed**
Message anyone with an obvious issue.

Set it and forget it

Menu:

Goolee →  **Enable auto-refresh after punch**

. After that, the Dashboard updates itself whenever someone punches.

HR: Common actions

Everything you'll do with the sheet, step by step.

+ Add an employee

1 Open the Employees tab
Add a new row: Name, PIN, TRUE (Active).

2 Clear the cache
Menu:
Goolee →  **Refresh Employee Cache**

3 Refresh the Dashboard
Menu:
Goolee →  **Refresh Dashboard**

4 Tell the new employee
Send them the URL and their PIN.

— Remove an employee

1 Open the Employees tab
Change
Active
from TRUE to FALSE.

2 Clear cache + refresh
Menu:
 **Refresh Employee Cache**
, then
 **Refresh Dashboard**
.

Never delete the row

Just set Active = FALSE. That keeps their attendance history.

Reset a forgotten PIN

1 Open the Employees tab
Change their PIN to a new 4-digit number.

2 Tell the employee
No cache refresh needed — it works right away.

HR: Leave & holidays

Keep the Dashboard accurate by recording time off.

Mark someone sick (MC)

1

Open the Leave sheet

Menu:

Goolee →  **Open Leave Sheet**

2

Add one row per day

Date · Name · Type = MC · Notes

3

Refresh the Dashboard

Menu:

Goolee →  **Refresh Dashboard**

Multi-day leave

Add one row per day. Example — Ravi on MC for 3 days:

2026-09-15

· Ravi K. · MC · Fever

2026-09-16

· Ravi K. · MC · Rest

2026-09-17

· Ravi K. · MC · Recovering

Other leave types

The Type dropdown offers four options:

✓ **MC** — Medical certificate / sick leave

✓ **Emergency Leave** — urgent personal matters

✓ **Annual Leave** — planned vacation

✓ **Unpaid Leave** — no-pay leave

Add a public holiday

1

Open the Holidays sheet

Menu:

Goolee →  **Open Holidays Sheet**

2

Add the holiday

Date · Holiday Name · Type

3

Clear cache + refresh

Menu:

 **Refresh Holidays Cache**

, then

 **Refresh Dashboard**

.

Quick reference

Pin this page next to your desk.

The Goolee menu

Goolee

-  Refresh Dashboard
-  Rebuild Dashboard
-
-  Refresh Employee Tabs
-  Force rebuild employee tabs
-
-  Open Leave Sheet
-  Refresh Leave Dropdown
-  Open Holidays Sheet
-  Open Settings Sheet
-
-  Clear all caches
-  Reapply red highlight
-
-  Enable auto-refresh after punch
-  Diagnose auto-refresh
-  Enable hourly auto-refresh
-  Disable auto-refresh

When to use which menu item

- ✓ **After adding staff** → Refresh Employee Cache + Refresh Dashboard
- ✓ **After adding holidays** → Refresh Holidays Cache + Refresh Dashboard
- ✓ **After marking leave** → Refresh Dashboard
- ✓ **When the Dashboard looks stale** → Refresh Dashboard
- ✓ **Once, on setup** → Enable auto-refresh after punch

Key numbers to remember

WORK START	WORK END	LATE AFTER	GPS ACCURACY
10:00	19:00	10:15	≤ 100 m

✓ That’s everything

Daily use is simple: employees punch in and out.
HR checks the Dashboard, marks leave, done.
